Summary

- Feedback on the book can be provide through the Control Loop Foundation website
- Questions?
- Drawing for books

How to Get More Information

■ Emerson Education Class

- **Control Loop Foundation, Course 9025 CEUs: 3.2**
- This course is for engineers, managers, technicians, and others that are new to process control or need a refresher course. This course includes the practical aspects of control design and process applications that course developers personally learned through years of hands on experience while designing and commissioning process control applications.

Overview

- This 4-1/2 day course covers the concepts and terminology that are needed to understand and work with control systems. Upon completion of this course the student will be able to effectively work with and commission single and multi-loop control strategies. Interactive workshops allow the student to apply what they learn in the class.

Prerequisites

- Windows experience.

■ Control Loop Foundation - ISA Book

- May be purchase through the ISA web site - <http://www.isa.org/>

■ Book Web Site

- Explore book workshops - <http://www.controlloopfoundation.com/>
