

# Measurement

Figure 3-1. Magnetic Flowmeter

Figure 3-2. Vortex Flowmeter

- Introduction to devices used for basic measurement

- Magnetic flow meter
- Vortex flow meter
- Differential pressure for flow measurement
- Coriolis flow meter
- Absolute and gauge pressure
- Temperature – RTD, thermocouple
- Level based on pressure/differential pressure
- Level - Radar

Figure 3-7. Temperature Transmitter

Figure 3-6. Pressure Transmitter

Figure 3-9. Radar Level Measurement

Figure 3-8. Level Measurement Based on Pressure

Figure 3-3. Flow Measurement Based on Differential Pressure and Orifice

Figure 3-5. Coriolis Mass Flowmeter

# Device Calibration

Figure 3-4. Hand-held Device to Check and Set Transmitter Calibration

- Concept of devices calibration and configuration is introduced.
- Role of hand held devices and EDDL is addressed
